

Mikhail Bezrukov

SENIOR TECHNICAL WRITER

Product documentation owner · Docs-as-code practitioner · Advanced AI user

Open to relocation to Spain · Snail7070@gmail.com · [Telegram channel](#)

■ PROFILE

Senior Technical Writer with nearly 4 years of experience owning customer-facing product documentation for U.S. healthcare IT software. I turn complex product behavior into clear user guidance, working with Product, Engineering, QA, and domain experts from research through publication and maintenance. I am an advanced user of AI tools for documentation work, using them to support research, editorial QA, screenshot workflows, and reusable documentation processes without losing human judgment.

■ AI WORKFLOWS

Advanced user of:

Claude & Claude Code
ChatGPT
Gemini
Cursor

Workflow design:

Create reusable skills and workflows for documentation drafting, editorial QA, screenshot preparation, UX copy, and maintenance tasks.

■ EXPERIENCE

Sxope - Lead Technical Writer

Nov 2022 - Present · Remote

- Own documentation for 8 healthcare IT services, maintaining 200+ Knowledge Base articles from product research and source verification through publication and updates.
- Co-create release communication across 18 services, selecting user-relevant changes and translating implementation detail into clear product updates.
- Produce UI guidance and visual documentation, including screenshots, diagrams, tooltips, alerts, and contextual help for clinical and operational workflows.
- Maintain 50+ articles in a Git / Markdown / Docusaurus docs-as-code workflow; use Python utilities and Claude Code workflows for documentation QA, article review, and screenshot preparation.
- Build reusable Claude and Claude Code skills and AI-assisted workflows that automate repeatable parts of documentation creation and maintenance, including drafting support, review, QA, UX copy, and screenshot preparation.
- Document API and integration concepts from Swagger / OpenAPI materials and developer input; collaborate daily with Product, Engineering, QA, analysts, and domain specialists.

■ SELECTED STRENGTHS

- Documentation ownership: from source discovery and validation to publication and ongoing maintenance.
- Visual documentation: screenshots, structured UI explanation, and context-aware help content.
- Documentation engineering: docs-as-code workflows, documentation QA, and small Python-based tooling.

■ CORE SKILLS

Product & technical documentation
Knowledge Base ownership
Release communication
UX writing
Information architecture
API documentation
